

RAID Trailer

RAPID ATTACK / INTERFACE DEFENCE

UTV-towed tank, pump and hose — five deployment modes from one trailer.

SPECIFICATIONS

Tank	185 US gal (700 L)
Pump	Honda 1.5" high-pressure
Loaded weight	Under 2,500 lb
Tow vehicle	UTV
Valving	4-valve manifold: tank suction, tank fill, outlet, draft
Standard hose	2 × 50' ¾" and 2 × 50' 1.5" forestry hose
Custom hose	Lengths built to order
Draft port	1.5" suction — pairs with the 1.5" Float Intake

DEPLOYMENT MODES

Pump and drive. Lay a wet line or knock down brush fire while moving.

Dual handline. Two ¾" lines off a Y adapter for a two-person crew.

High-volume handline. 1.5" line for fast, heavy water.

Extended reach. Work away from access, or feed structure-protection sprinklers.

Drafting. Refill the tank or run from a pond or creek. Draft clean water only — the Honda is not a trash pump.

Applications

Wet lines

Handline attack

Structure protection

Drafting from open water
